

# MAKE ICE.

...MOST COMPREHENSIVE LINE  
OF CO<sub>2</sub> & DRY ICE EQUIPMENT

*The right dose at the right time.*

TOMCO<sub>2</sub> Systems' snow hoods can be adapted to your present production line and can be fully automatic or manually controlled. Simple to operate, our snow hoods offer a cost effective method of preventing dehydration, retarding bacteria growth and removing heat.

84" tall x 41" deep x 69" wide

## FEATURES

- USDA approved for use around food
- Full stainless-steel enclosure to contain dry ice snow
- Additional vapor vent to minimize CO<sub>2</sub> build-up in process areas
- Variable snow application rate
- Proven components and design minimizes maintenance
- Built-in power conveyor
- Integrated barcode scanner for automatic fill of multiple products
- PLC controlled
- Reversible belt direction
- Exhaust port to ventilate gas
