

We help make constructive uses of CO₂ possible

Carbon Capture & CO₂ Recovery

With our cost-effective carbon recovery plants and latest purification & liquefaction technologies, we can reduce your carbon off-put while increasing profitability and carbon intensity score. Tomco will remove carbon dioxide from where it is unwanted and utilize it where it is needed, helping businesses with both financial and environmental objectives.

- Recover exhaust streams off boilers, freezing & dry ice production, renewable natural gas, & more.
- Recycle CO₂, with a of purity of 99.99%, back into your processes.
- Distribute excess liquid CO₂ across additional internal facilities, securing supply.

Benefits

- Qualify for tax incentives, further reducing operating expenses. Take full advantage of 45Q and the changing state and federal incentives.
- Create a more ecologically responsible business and progress towards a carbon neutral footprint.
- Security of supply. Reduce your overall usage of CO₂ without impacting your productivity or production output.
- Reduce dependence on CO₂ supplier, in turn reducing operating expenses & minimizing supply disruptions.

Creating sustainable uses of CO₂ for a carbon neutral infrastructure.
